## ● QY Bluetooth Display Pairing Instructions ●

### Method One: Wireless Pairing

1. Long press the Bluetooth button for 3 seconds. The second digit of the digital tube will display a "fast blinking underscore", indicating entry into Bluetooth pairing mode.

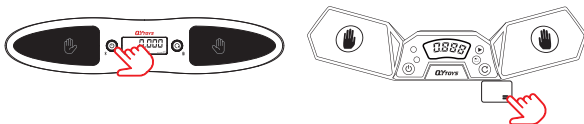

Long press the Bluetooth button for 3 seconds

The second digit of the digital tube will display a "fast blinking underscore"

2. Ensure the adapter/second-generation timer you want to pair is powered on and is not currently bound or previously bound to another user.

①Power On: Short press the power button on the adapter/timer.

②Reset Bluetooth: For second-generation timers, press and hold the power button to reset Bluetooth. For adapter, press and hold the button to reset Bluetooth.

---

3. Wait for the Display to search for Bluetooth devices. The status indicators on the digital tubes are as follows:
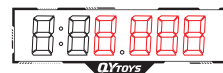

| QY BLUETOOTH DISPLAY SCREEN STATUS INDICATORS | | |
|---|---|---|
| **Digital Tube Position 1** | **Digital Tube Position 2** | **Digital Tube Positions 3-6** |
| Blank: Indicates a Bluetooth Timer was found | Fast Blinking: Searching for devices | Last 4 digits of the found device's MAC address |
| A: Indicates a Transmitter was found | Slow Blinking : Pairing with this device | |

4. If multiple devices nearby are in a pairable state, short press the Bluetooth button to cycle through and select the device you wish to pair with.

5. Confirm the target device by observing its MAC address last 4 digits. Long press the Bluetooth button for 3 seconds to start pairing with that device. During pairing: The second digit will display a "slow blinking underscore".

Observe the MAC address

Long press the Bluetooth button for 3 seconds

6. Wait for pairing with the device to complete (usually 5-10 seconds). Upon successful pairing, the screen will display 0.000.

*If pairing does not complete, ensure the adapter/second-generation timer is powered on.

### Method Two: Insert Bluetooth Adapter Pairing

1. Insert the Bluetooth adapter into the Display.

2. Long press the Bluetooth button for 3 seconds to enter pairing mode.

*Ensure the adapter has batteries installed and is powered on first.

Long press the Bluetooth button for 3 seconds

3. Wait for the Display and adapter to pair automatically. Upon successful pairing, the screen will display 0.000.

---

### QY Bluetooth Display Button Functions

1. Long Press (3s): Enter pairing mode.
2. Short Press (In Pairing Mode): Cycle through available devices to connect to.
3. Long Press (3s in Pairing Mode): Start connecting to the selected device.
4. Long Press (10s in Any Mode): Reset Bluetooth (screen will show 8:88.888).
5. Force Exit Pairing Mode: Power off and then power on the Display.

#### Auto Timeout

1. During Bluetooth Search: If no devices are found, it will time out and enter sleep mode after 10 minutes.
2. During Bluetooth Connection: If unable to connect to a device, it will time out and enter sleep mode after 10 minutes.

#### Low Battery Indicator

If the screen flickers, it indicates the batteries need replacement. Important: Always use 4 Alkaline AA batteries. Look for the "Alkaline" marking on the batteries.

#### Auto Connect

●After each power-on, the QY Bluetooth Display will automatically search for and attempt to reconnect to the last adapter/second-generation timer.

●To disable auto-connect, long press the Display's Bluetooth button for 10 seconds to reset it.
